The examples of the invention provide thermoplastics with excellent flame retardant behavior without the use of Polytetrafluoroethylene Powder (Teflon®) halogen-containing additives. Addition of Polytetrafluoroethylene Powder to the flame retarded compositions of this invention in some cases further improved the flame retardant and UL94 behavior of the compositions of this invention.

The following is an examiner's statement of reasons for allowance:

The examiner's amendment inserts the replacement page that applicant provided in the latest response, but failed to provide proper instructions for doing so. The data is not considered new matter as the values are merely the inherent properties of the disclosed examples (MPEP 2163.07(a)).

The previously applied art does not suggest any particular amount of silicon bonded hydrogen content, nor do any of the examples possess silicon bonded hydrogen. It would not have been reasonable to include at least 13% silicon bonded hydrogen in Asano's silsesquioxane based on the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
